### **DETAILED ACTION**

The art unit designated for this application has changed. Applicant(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

Applicant is hereby notified that the required timing for the correction of drawings has changed. See the last 6 lines on the sheet, which is attached, entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicant is required to submit drawing corrections within the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-31, 35, and 36; drawn to methods and systems for managing immunocompetent cells, classified in Class 435, subclass 6. If this Group is elected, then the below summarized specie election is also required.
- II. Claims 32-34, drawn to methods of therapy, classified in Class 514, subclasses 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the Group I is drawn to method for managing batches of immunocompetent cells, such as leucocytes, lymphocytes, monocytes, which can be

Art Unit: 1631

practiced with, for example, for bone marrow sells, cancer cells, or another distinct usage of an cells circulated in the blood, in order to produce another biological entity separate from blood per se, or, alternatively, the therapy in an active area of interest.

The invention of Group I and Group II are distinct in that one is directed to process for managing of batches of immunocompetent cells collected and preserved for deferred use whereas Group II is practice therapy method comprising the step of re-injection immunocompetent cells in the body of a human or animal subject.

***SPECIE ELECTION REQUIREMENT FOR GROUP I:***

This application contains claims directed to the following patentably distinct species of the claimed invention: These species are distinct in that means and methods for collecting and saving of immunocompetent cells including implemented in therapy and for deferred use only are deemed separate and distinct practices requiring a separate search.

Specie A: cells stored for deterred use only;

Specie B: including implemented in therapy.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the

Art Unit: 1631

election, applicant must indicate which are readable upon the elected species. M.P.E.P.

§ 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703) 308-4242 or (703) 305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikolai Galitsky, Ph.D., whose telephone number is (703) 308-2422. The examiner can normally be reached on Monday-Friday from 8:30 A.M. to 5 P.M.

Art Unit: 1631

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703) 308-4028.

Any inquiry of a general nature or relating to the status of this application should be directed to Patent Analyst, William Phillips, whose telephone number is (703) 305-3482 or to the Technical Center receptionist whose telephone number is (703) 308-0196.
